About Me

A highly skilled and innovative MERN Stack Developer with a passion for creating efficient, scalable, and high-performing web applications. Seeking to leverage extensive knowledge and expertise in MongoDB, Express, React, and Node.js to contribute to challenging projects in a dynamic and collaborative environment.

Work Experience

- Designed, developed, and maintained full-stack applications using the MERN stack.
- Implemented responsive and user-friendly front-end interfaces using React and Redux for state management.
- Created RESTful APIs using Node.js and Express for efficient data exchange.
- Integrated and managed databases using MongoDB, ensuring high performance and scalability.
- Collaborated with cross-functional teams to identify project requirements and implement solutions.
- Optimized application performance through code refactoring and incorporating best practices.
- Conducted thorough testing and debugging to ensure functionality and resolve issues.
- Proficient in JavaScript, HTML, CSS for front-end development
- Extensive experience in MongoDB, Express.js, React, Node.js
- Strong understanding of RESTful APIs and microservices architecture
- Knowledge of version control systems like Git
- Familiarity with Agile methodologies and project management tools
- Ability to work independently and in a team, with strong problem-solving skills
